Innovator And Leading Manufacturer In Silicone Houseware Industry

Like a mum sees her new-born baby at first glance, the same happiness we experienced at the moment of watching a perfective new product standing in front of us.

ARP's continued success starts from the indefatigable enthusiasm in innovation and product enhancement. This has been an important gene of ARP.

Our own products are members of our families now, we use them in everyday life, we tried firstly and finally loved the wonderful items. We pursue quality life and prefer to use quality items, it is also our faith and pleasure to introduce and supply the creative and quality products to other families in the world. This is our value.

Delightedly we found more and more people adopted silicone products for their daily life, and more and more distributors showed enthusiasm on distributing the products. As silicone is a kind of eco-friendly and healthy material, we will be very happy to expect a better world with less pollution and less resource consumption in the future.

In 2013, we enlarged our ranges from kitchen to a portfolio of outdoors, kitchen and living. We will continue to bring surprises to customers, you will find silicone can be used in so many different products and functions of the products are finally enhanced with silicone.

Now we are working with some main distributors with famous brands and main retailers with private labels all over the world. We are compliance with common requirements of ISO9001:2000, BSCI, SA8000 and special requirements of retailers in North America, Europe, Oceania and Asia.

We are inclined to establish long term partnership with the most suitable distributors and retailers in one market or territory, maybe they are not the largest, but they naturally have enthusiasm in working closely with us on our products or their own designs. It will be our pleasure to offer supports to the partners as much as we can.

You are welcome to visit our factory at any time if you have interest in cooperating with us! We look forward to an opportunity on understanding each other more.

OUTDOORS

Have more energy from nature.

FLEXIBLE

Silicone Water Bottles

Colorful silicone.

Unique ON-OFF knob switch.

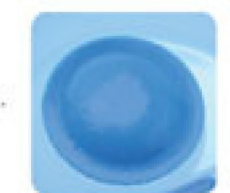

Made by Platinum Silicone, BPA free and Odorless.

Rolled up for easy-go!

Exciting option for a silicone band.

Silicone sealing, airtight and leakage-proof.

High strength cap, impact resistance.

Silicone spring for comfortable flip.

PP grab for easy grab and insulation.
